Fall to Spring Retention Rate
 Fall to Fall Retention Rate
 6 Yr Graduation Rate

Students who enrolled as full-time students for a full semester the first time in the fall of the identified year are members of the cohort. (Students who withdraw prior to the end of the semester are not included.)

The challenge is to enhance the probability that a student who persisted to the spring semester of their freshman year will return in the fall. The data seems to indicate a slightly higher attrition in the spring semester of the freshman year than the fall. The blue column reflects the greatest drop in persistence. For example, note that 30% dropped for spring of the freshman year to fall of the sophomore for cohort 2014.

The clear implication is that retention is an enormous challenge in the first year.
